### **DETAILED ACTION**

Acknowledgment is made for the information disclosure statement (IDS) filed on 12/20/2004. Receipt is also acknowledged for oath or declaration filed on 12/20/2004.

#### ***Election/Restrictions***

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

The species from formula I.

An applicant claimed diacylglycerol ether as an active ingredient represented by the formula I with undefined substituents of R1, R2, and R3 denoted as C12-24 aliphatic hydrocarbon and acyl group.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

Art Unit: 1615

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

The following claim(s) are generic:

- (a) R1 denoted, as C12-24 aliphatic hydrocarbon group
- (b) R2 denoted, as C12-24 acyl group
- (c) R3 denoted, as C12-24 acyl group are generic and undefined.

Examiner is requesting that an applicant should elect for formula I a specific name of aliphatic hydrocarbon and acyl group for each substituent of R1, R2, and R3.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

An applicant claimed diacylglycerol ether as an active ingredient represented by the formula I with undefined substituents of R1, R2, and R3 denoted as C12-24 aliphatic hydrocarbon and acyl group.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

In view of multiple elections, applicant was not called.
